Why This Model Benefits Your Brokerage

The market opportunity behind a flat-fee, buyer-led offering

The Market Opportunity

Sellers who say agents are “**inherently necessary**” dropped from 73% in 2024 to 63% in 2025 — a growing share now open to alternative, mid-tier pricing models.

An estimated **12% of buyers** purchase a home with no agent representation at all — a sizable, underserved segment to target directly.

How Buyer-Led Fits Into Your Brokerage's Funnel

The flat-fee offering is the entry point: advertising draws in price-sensitive, self-directed buyers who might otherwise go unrepresented. After a free consult, buyers who are comfortable managing their own search stay on the Buyer-Led track — while buyers who realize they want more hands-on support are referred internally to a traditional full-service agent, keeping that business inside your brokerage's network either way.
